NuGet packages with all dependencies for use on build servers like Azure DevOps			✓

Licensing and pricing

List & Label is based on personal developer licenses that you need to licence according to the size of your developer team. The licenses can be used for an unlimited period of time. All editions include a subscription, i.e. a combination of maintenance and support contract.

	STANDARD	PROFESSIONAL	ENTERPRISE
New license	740.00	1.390.00	1.990.00
Subsequent year	370.00	695.00	995.00

Our offers are exclusively for commercial customers. All prices are in Euro and subject to VAT.

Favorable team discounts from three developers up

3-4: 25% | 5-9: 30% | 10-19: 35% | from 20: on request

Corporate license on request

	STANDARD	PROFESSIONAL/ENTERPRISE
Support	Free support via forum or direct, fee-based manufacturer support via telephone or support portal. (According to effort 3.50/min)	Free and direct premium manufacturer support via forum, phone or support portal including remote support
Maintenance	Including service packs, feature updates and upgrades to new versions while subscription is valid	Including service packs, feature updates and upgrades to new versions while subscription is valid

Licensing

List & Label is a personal developer license, non-transferable and for installation on one PC. Alternate use on a notebook permitted.

Important

You need a license for every developer who is involved in the overall project and/or the overall

product in which List & Label is integrated. In this respect, it is irrelevant whether a developer uses List & Label functions or not. A project group must decide which of the editions they all want to go for. Our basic conditions are fair, however they have not been calculated so as to enable large projects with maybe tens of thousands of end users to be covered by a single license.

If you have any questions about licensing or the possibilities of an individual agreement, please do not hesitate to contact us.

“I am very satisfied with List & Label. After a short training period, I already get along very well with the designer. Programming is also no problem thanks to the good documentation. Overall, I am very satisfied, in numbers I would say 9 out of 10. I also find it super and not a matter of course to seek contact with the customer.”

Matthias Deisböck,
Deisböck IT Solutions GmbH

General information

Individual agreements

The areas of application and possibilities of List & Label are very varied and extensive. Unfortunately, we cannot cover all constellations through our standard license agreement. If you would like to implement a printing solution such as a label or barcode solution, please contact us. This also applies if you plan a report generator, want to encapsulate functionalities or if your customers need to have a developing access to the application. We will then gladly examine the possibilities of an individual agreement.

Subscription

The subscription includes all service packs, feature updates and updates to major versions during the subscription period. You can also use all major versions in parallel. Support is included for Professional and Enterprise Edition. For the Standard Edition, the included service is limited to support in the forum. The subscription is valid for 1 year. If you do not terminate the subscription in writing with a notice period of 3 months to the end of the contract year, it will be automatically renewed for a further contract year at the conditions of the following year.

Price quotation

Our offers are exclusively for commercial customers. All prices are in Euro and subject to VAT. All prices are based on the effectiveness of our general terms and conditions (www.combit.com/legal-notice) and the corresponding combit licence agreement. With this price list all previous price lists lose their validity. Information is only a description and does not guarantee the quality of the products. We will be happy to provide you with an individual offer for other volume discounts, team licenses or upgrades with license extensions.

Installation

A List & Label license entitles you to installation on one PC. Alternating use on a notebook is also permitted. As long as technical means are used to ensure that only a correctly licensed List & Label developer has access to the List & Label license and its development possibilities, you can use a List & Label license in the network and thus also on a build server.

Thousands of development teams worldwide successfully use List & Label. There are many benefits for you and your customers:

- ✓ Redistribute the Report Designer without additional license costs, also in the browser
- ✓ Fast performance, scalability and always up to date
- ✓ Professional reports and interactive dashboards
- ✓ For desktop, web and cloud
- ✓ For more details please visit www.combit.com
