Support	Invoiced on a time and materials basis, 3.00/min (plus VAT if applicable)	Included while subscription is valid
Service	Service packs for one year	Including service packs, feature updates and upgrades to new versions while subscription is valid

Licensing

List & Label is a personal developer license, non-transferable and for installation on one PC.

Important

You need a license for every developer who is involved in the overall project and/or the overall product in which List & Label is integrated.

In this respect, it is irrelevant whether a developer uses List & Label functions or not. A project group must decide which of the editions they all want to go for. Our basic conditions are fair, however they have not been calculated so as to enable large projects with maybe tens of thousands of end users to be covered by a single license.

If you have any questions about licensing or the possibilities of an individual agreement, please do not hesitate to contact us.

Server/Web Server Licenses

	Benutzer	STANDARD/PROFESSIONAL		ENTERPRISE
		net	gross	
Standard and Professional Edition If you integrate List & Label into a server/web server application using not the Enterprise Edition, but instead the Standard or Professional Edition, you require server/web server licenses. For each installation of an application, server/web server licenses with the corresponding volumes are required. Your application is a server/web server application if it - e.g. utilizes internet protocols - is a web server extension - is integrated into ASP or PHP pages - is an independent server application	5	99.00	114.84	incl.
	50	899.00	1,042.84	incl.
	100	1,699.00	1,970.84	incl.
	1000+	14,999.00	17,398.84	incl.

General Information

Subscription

The subscription includes all service packs, feature updates and updates to major versions during the subscription period. You can also use all major versions in parallel. Support is included. The subscription is valid for 1 year. If you do not terminate the subscription in writing with a notice period of 3 months to the end of the contract year, it will be automatically renewed for a further contract year at the conditions of the following year.

Installation

A List & Label license entitles you to installation on one PC. Alternating use on a notebook is also permitted. As long as technical means are used to ensure that only a correctly licensed List & Label developer has access to the List & Label license and its development possibilities, you can use a List & Label license in the network and thus also on a build server.

Language Kits

The List & Label Designer is available in German and English. With additional language kits it can be switched into other local languages. Language kits are version-specific. You always need as many language kits as developer licenses. The Enterprise Edition automatically includes all available language kits.

Individual Agreements

The areas of application and possibilities of List & Label are very varied and extensive. Unfortunately, we cannot cover all constellations through our standard license agreement. If you would like to implement a printing solution such as a label or barcode solution, please contact us. This also applies if you plan a report generator, want to encapsulate functionalities or if your customers need to have a developing access to the application. We will then gladly examine the possibilities of an individual agreement.

Upgrade

A discounted upgrade to the current Standard Edition is available on the basis of the last two previous versions. This is a license exchange, you renounce the right to use the previous version by using the upgrade.

Price Quotation

All prices in Euro. Net prices are quoted exclusive of statutory value added tax. All prices are based on the effectiveness of our general terms and conditions (www.combit.com/reporting-tool/legal-notice) and the corresponding combit licence agreement. With this price list all previous price lists lose their validity. Information is only a description and does not guarantee the quality of the products. We will be happy to provide you with an individual offer for other volume discounts, team licenses or upgrades with license extensions.

Thousands of development teams worldwide successfully use List & Label. There are many benefits for you and your customers:

- ✓ Report Designer in the Microsoft Office look & feel can be redistributed with no extra cost
- ✓ Fast performance, scalability and always up to date
- ✓ Professional reports and interactive dashboards
- ✓ For desktop, web and cloud
- ✓ For more details please visit www.combit.com/reporting-tool
